Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/789,325

Applicant(s)

OKUNIEWICZ, DOUGLAS M.

Examiner

ADETOKUNBO O. TORIMIRO

Art Unit

3714

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 January 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 and 17-55 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 and 17-55 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/S5108)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

1. The amendment received on 01/28/2009 has been considered

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meekins et al (US 6,685,563).

Re claims 1,4,10,15,17,25,41,42,50, and 51: Meekins et al teaches a gaming device interface comprising interface means for detecting and receiving, analyzing and translating an event signals (see col.5, lines 53-67; col.6, lines 1-12; and col.9, lines 4-12); lottery entry means (see col.11, lines 1-7; col.13, lines 1-3,13-16, and 28-35); outputting lottery outcomes (see col.11, lines 44-51 and 64-67). Meekins does not explicitly disclose detection means and outputting lottery entry dispensing commands upon an occurrence of an event. However, since Meekins discloses constantly monitoring the occurrence of an event for activating the lottery game (see col.13, lines 21-27), Meekins obviously discloses the detection means for constantly monitoring the occurrence of an event since it is obvious that during constant monitoring every action in the event will be monitored. Further, since Meekins et al discloses providing a lottery ticket when the computer detects a game event (see col.13, lines 28-31 and 34-35), and since generating a command from a controller to an output device for the output device to perform a

function according to the controller's command would have been known in the art. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to generate a lottery ticket dispensing command from a controller to the ticket dispensing means of Meekins in order to allow the controller to control peripheral devices such as a ticket printer, etc.

Re claims 2,3,5-9,11-14,52,54, and 55: Meekins et al teaches using software, hardware, and firmware for detecting occurrences of an event (**see col.6, lines 47-63**); outputting lottery tickets (**see col.13, line 35**); tracking coin-in (**see col.6, lines 1-11**).

Re claims 18-24,43-49: Meekins et al teaches detaching or integrating the lottery system to the gaming device (**see col.11, lines 8-16**); transmitting data between game devices via LAN (**see col.8, lines 21-31**); enabling and disabling the gaming device (**see col.11, lines 17-22**); a central lottery system (**see col.13, lines 13-17**) and a central computer system (**see col.8, lines 29-31**).

Re claims 26-40 and 53: Meekins et al teaches outputting lottery outcomes (**see col.11, lines 44-51 and 64-67**); the lottery event is generated or initiated for generation by the gaming device or lottery system (**see col.11, lines 8-51**).

Response to Arguments

4. Applicant's arguments filed 01/28/2009 have been fully considered but they are not persuasive.

In response to Applicant's argument about parent Applications 09/639,441, 08/944,075, and 08/795,152 predating Meekins' filing date, Examiner agrees, but however points to Applicant as noted above that parent applications predating an application doesn't imply or

construe that the application benefits from the prior filed application. In light of this, Examiner points to Applicant that claim 1 includes "lottery entry means" that is not disclosed in any of the parent nor grandparent applications. Examiner points out that as argued by the applicant, the parent and grandparent patents simply mention the word "lotteries" but does not teach the limitation or feature of entry into the lottery game, which is the limitation claimed in the current application. Therefore the earliest filing date for claims 1-14 is the filing date of application 60/196,827.

Claims 15,25 includes "central lottery system... terminal/electronic device operative for gaming purposes" that is not disclosed in any of the parents nor grandparent applications. Once again the examiner points out that the parent and grandparent patent teaching or mentioning state-run lottery or the other cited portion by the applicant, does not teach gaming terminals or electronic device operative for gaming purposes in the central lottery system. Therefore the earliest filing date for claims 15 and 17-49 is that of the present application. Claim 50 and 51 includes "lottery device that issues a verifiable entry to a lottery event" and "means for generating a verifiable entry to a lottery event" that is not disclosed in any of the parent nor grandparent applications. Further with the above argument by the examiner, the earliest filing date for claims 50-55 is that of the filing date of application 60/196,827 since the parent and grandparent simply mention state-run lotteries which is a well known lottery type and not a specific invention of the applicant. Therefore it is noted that the earliest filing dates of Meekins is before the earliest filing dates applied to the claims of the present application, and therefore applicable as a reference and prior art in considering patentability of claims 1-15 and 17-55.

In response to Applicant's argument that "lottery ticket" is not in the application filed March 2,2000, Examiner points Applicants to claim 2 of Meekins and adds that this application is used as the reference and its filing date is Mar 2, 2000. Examiner also notes that it is unclear exactly what the Applicant's argument is.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adetokunbo O. Torimiro whose telephone number is (571) 270-1345. The examiner can normally be reached on Mon-Fri (8am - 4pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Hotaling can be reached on (571) 272-4437. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
